Student Testimonies

Read below why
students recommend this class.

I give this class two thumbs up...way up! I totally recommend this class to anyone interested in health care. It will enrich your life and put a smile on your face.

Azael F., MPhT, Scotts Valley

The class covers all areas and is helpful to everyone, whether you have a lot of dental experience or none at all. Everybody will learn something new!

Anna A. Davenport

I really enjoy taking the Dental Terminology class. I've been learning a lot more terms that I have been using in my dental assisting job. I definitely recommend this class to anyone who needs help or want to learn more about the dental field.

LeVon S., Hollister

I would recommend this class to anyone that is interested in the dental field, especially since you can receive CE credit, as well. Plus there is nothing offered over my side of the hill.

Inger P., San Jose

As a student on the DH waitlist, the Dental Terminology class couldn't be more helpful. It's great preparation for the program and it's a great companion or prerequisite for BIO7 Head and Neck Anatomy, which is a requirement for the program. I find that studying and reading for one course helps me get ahead for the other!

Jennifer M., Soquel
