

San Jose State Majors that require a Minor to graduate

There are seven majors at San Jose State that require minors to graduate. San Jose State doesn't require any of the coursework for these minors to be completed prior to transfer, however, it is very useful to know -- because some of our students may want to take some of the coursework at Cabrillo prior to transfer.

1. **The biological sciences** require a minor in chemistry
2. **International business** requires a minor in the area of study (i.e. if you plan international business in Spain or Mexico, you need to take courses in the language and geography of those countries).
3. **All language majors** require a minor in another language
4. **Psychology** majors required a minor, and there are a number of choices (see catalog)
5. **Hospitality Management** requires a minor in business
6. **Industrial Technology** requires a minor in business with a management emphasis
7. **Radio, TV, Film** requires a minor, and there are a number of choices (see catalog).

This Information was given to Donna Mekis in conversation with Sandy Smith from San Jose State –October, 2003.
