Dear Students,

I am looking forward to spending time with you during our sculpture workshop. I have named this workshop “Sculptural Form from Repurposed Objects” because I believe that choosing, handling, and designing new forms from disparate, found objects is delightfully experimental and creative. You will build tabletop-sized sculptures that are crafted from an array of various objects, which will be provided on the first day of class. Your materials fee of $20 will cover the materials provided as well as those needed to make attachments or to create embellishments.

Not only will this course ignite your creative fires and encourage you to experiment, but you will also learn the approaches needed to assemble and attach the objects that form your sculptures. We will go over basic techniques for making permanent attachments and solid foundations. We will brainstorm some ideas to get you started. You will not need to bring tools. We have lots of tools that will stay in the classroom or can be checked out from the tool room.

Lunch
There is no food service on campus for lunch during these workshop classes; however, a couple of cafes are within driving distance. We do have access to a refrigerator, toaster oven, microwave, and coffee maker. You can bring any snacks to share.

What To Wear
Please wear closed-toe shoes. Also, an apron and wipe-up rags are good options too.

What To Bring
Please bring with you a sketchbook or notebook and a pen or pencil so that you can sketch or draw ideas as they come to you.

I want you to come to class relaxed, with a clear mind and ready to make fabulous work. But if you have any questions, please email or call the Cabrillo Extension Office.

Until then,
Diane Patracoula
