REGISTER BEFORE JUNE 11th FOR DISCOUNTED FEES ON SELECT CLASSES!
Regional Barbeque Road Trip:
Eastern North Carolina
First stop—Eastern North Carolina, one of the oldest barbeque locations in the U.S. Traditionally they cook a whole hog, low and slow, mopping it with apple cider vinegar and red pepper sauce, until it falls apart. Then it gets chopped up and drenched with more sauce. Learn to prepare meat for the grill, then barbecue a pork shoulder, and make vinegar-pepper sauce. The meat will fall apart easily and the vinegar sauce adds a bright, crisp flavor that makes it nearly impossible to stop eating!

Thu., June 11
4:00 - 5:30 pm
Fee: $25
Sean Adams - see bio, page 2

Regional Barbeque Road Trip:
St. Louis
One of Sean’s favorites, and great for barbeque beginners! The St. Louis style of barbeque consists of using the spare rib—the part of the rib near the belly—which is extremely flavorful. The sauce is sticky, sweet (you can add some heat if you like), and a perfect pairing to match the richness of the ribs. We will make a dry rub for our ribs to marinate overnight and instructions on how to barbecue your ribs the following day, and of course Sean will demo how to make a rich, tomato-based St. Louis barbeque sauce.

Thu., June 25
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio, page 2

Regional Barbeque Road Trip:
Santa Maria, California
Home sweet home! Santa Maria, California, where tri-tip first became popular and is now ubiquitous with barbeque throughout the western states. The spicy, simple dry rub that thickly coats this thick tomato-based sauce that can be sweet or spicy. Unlike in North Carolina, the barbeque of Kansas City includes all the usual proteins: beef, chicken, pork, turkey, and more. Sean will show you how to prepare a whole chicken for smoking, starting with a dry rub and finishing with a sweet or spicy (you can easily add the amount of heat you prefer) thick and robust barbeque sauce.

Thu., June 18
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio, page 2

Register before June 11th for Early Bird discounts on select classes!

Register 2 or more for Bring A Friend discounts on select classes!

REGISTRATION IS EASY!
Register online at cabrillo.edu/extension or see page 44 for more information.

PLEASE NOTE: Check-in begins 15 minutes before the start of each class or camp.
Vegetarian Cooking Series
For each class, Sean will provide a detailed demo, important tips for preparation and technique, suggestions for substitutions for any hard-to-find (or forgotten) ingredients, and answers to student questions. By the end of class you will be ready to make these tasty, textured dishes in your own kitchen—just in time for dinner that night, and many nights to come! Ingredients list is available to view in the online class listing. Students will receive their recipes 2 days before class, so they can be ready to start cooking right after class, or whenever they are ready to make this delicious dish!

Register for all three classes before June 11: $68
Register for all three classes after June 11: $75

Tempe-stuffed Portobello
Mushroom with Creamy Cashew Sauce
Learn to create one of the most hearty, healthy, and delicious vegetarian main courses! Sean will take you through the preparation of tempe-stuffed portobello mushroom with creamy cashew sauce, and the perfect pairing of mouth-watering, herbaceous amaranth tabouli.

Tue., June 16
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Marinated Tofu and Grilled Vegetable Enchiladas
Learn to make marinated tofu and grilled vegetable enchiladas, and have enough home-made red enchilada sauce to freeze for future use. This dish is guaranteed to become a staple for future meals.

Tue., June 23
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Black Bean Burgers with Quick Pickles & Aioli
Learn how to make these amazing, super savory vegetarian burgers, easy quick-pickles and lemon/garlic aioli. The rich flavor of the burger is a perfect pairing for the fragrant snap of the aioli, and will work beautifully with any burger dressing of choice. Sean will provide a detailed demo, important tips for preparation and technique, suggestions for substitutions for any hard-to-find (or forgotten) ingredients, and answers to student questions. By the end of class you will be ready to make these delicious burgers in your own kitchen, or for a backyard bbq—just in time for dinner that night, and many nights to come!

Monterey Bay Seasonal Delicacies of Summer Series
There is no better time to explore the windfall of local organic produce in the Monterey Bay than in summer. Join chef Sean as he takes you on a virtual cooking tour using the spectacular bounty we have growing around us. Sean will provide detailed demos, important tips for preparation and technique, suggestions for substitutions for any hard-to-find (or forgotten) ingredients, and answers to student questions. By the end of each class you will be ready to make these delicious seasonal summer delicacies in your own kitchen—just in time for dinner that night, and many nights to come!

Ingredients list is available to view in the online class listing. Students will receive their recipes 2 days before class, so they can be ready to start cooking right after class, or whenever they are ready to make this delicious dish!

Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Roasted Summer Veggies & Quinoa
This is one of Sean’s go-to’s when he’s making something to bring to a potluck. This rich salad is excellent as a main dish and can be served hot or cold. The roasted summer vegetables and quinoa blend with cherry tomatoes, sheep’s feta, hard boiled eggs, fresh herbs, toasted nuts and tahini dressing makes the perfect taste and texture combo!

Wed., June 17
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Heirloom Tomato Pie with Manchego, Fresh Basil, & Homemade Pie Crust
Nothing says summer like local heirloom tomatoes! We will make the most of this summer delicacy using tart tomatoes, fragrant basil, manchego cheese, and a delicate pie crust that will melt in your mouth.

Wed., June 24
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Mushrooms en Papillote (Mushrooms in Parchment)
This show-stopping dish is full of flavor, using fresh summer herbs and creamy butter, and can accompany a wide variety of side dishes. We’ll also prepare a lemon-parmesan orzo salad, creating a well-rounded meal that’s ready to enjoy!

Wed., July 1
4:00 - 5:30 pm
Register before June 11: $25
Register after June 11: $28
Sean Adams - see bio

Selecting & Cooking Local, Sustainable Fish
This is the perfect time of year to brush up on your salmon cooking skills! Sean will discuss one of his favorite vendors at the Santa Cruz Harbor—H&H Fresh Fish, a local & sustainable seafood company. In this class, Chef Sean will discuss how to select the best fresh, local salmon, and will demonstrate how to prepare pan seared salmon with a variety of classic and modern sauces. Sean will also discuss a variety of cooking methods for salmon, and other easy to prepare sauces that can complement this delicate and delicious local resource.

Using the ingredients list (with suggestions for where to buy your local, fresh salmon), and list of simple tools found in most kitchens, Chef Sean will guide you through preparing this meal step by step, then leave you to enjoy your delicious masterpiece in the comfort of your own home!

Wed., June 10
4:00 - 5:30 pm
Fee: $25

Found Object Printmaking: Creating Beautiful Art with What’s On Hand

Printmaking with found objects—really? Yes, really! We all have time on our hands—but what materials do you have on hand? In this found object printmaking class, we'll explore the nearly endless possibilities of using what’s right there at home to make prints. You’ll be amazed at how much you can do with so little. Do you have keys? Mesh vegetable bags? Empty almond or soy milk boxes? Cardboard? Mat board? Leaves? String? Empty potato chip bags? We can make art with all of this, and so many other simple objects that you have around your house. You can create delicate, interesting, layered, or bold patterns and create engaging images. All you need is your imagination and a few basic printmaking supplies! This class is suitable for ages 14 and older!

For the first half hour of each class, Melissa will offer demos, share videos and slides. Then you will have time to work on your prints, with access to Melissa for questions and guidance. For the last 30 minutes of class we’ll come back together to share the work we’ve completed, get answers to questions, and compare notes on successes, challenges, and everything in between!

Materials list available to view in online class listing.
Mon., Wed. & Fri., June 22, 24 & 26

PLEASE NOTE: Check-in begins 15 minutes before the start of each class.

Black and White Linoleum Block Prints

Printmaking is a process of mirror images and surprise, making it the perfect medium for the playful, puzzling, and mysterious. Meet Melissa virtually in her beautiful home studio for this interactive class, as you learn to make linoleum block prints in the comfort of your own home. During class we will view examples by various printmakers, discussing styles, technique and imagery. We will explore the many ways drama and impact can be accomplished through the simple use of black and white, and the skillful use of a variety of tools and the specific marks they make. We will discuss contrasting or subtle textures and patterns, as well as the consideration of a light source, and how they play a part in achieving a strong and compelling result. What tales do you want to tell with images?

The focus will be to help students gain experience using carving tools, and learn how to use them, and will practice mark-making, inking, and using print mark guides. There will be plenty of time to finish at least one black and white linoleum block print, and make a small edition. Students will gain skill and confidence to carve, ink, and print their own linoleum block prints at home.

Students will need to prepare one or two sketches or photos to use as the basis for their prints.

At the beginning of each class, Melissa will offer demos, share videos and slides. Then students will have time to work on prints, with access to Melissa for questions and guidance. At the end of class we’ll come back together to share the work we’ve completed, get answers to questions, and compare notes on successes, challenges, and everything in between!

Materials list available to view in online class listing.

Register before June 11: $75
Register after June 11: $82
Melissa West - see bio

“One focus of my classes is showing students how easy it is to do linoleum block printing at home. Teaching online is the ultimate test of that idea. In a way, working remotely has led my students to come up with some really great questions and insights that they might not have had if we met in person. The best moment was on the last day of class, when all the students shared their finished work. I was blown away by what they had accomplished.”

~Melissa West

Melissa West

Melissa West is a member of the California Society of Printmakers and WEAD (Women Eco Artists Dialog). She has been exhibiting her work throughout California for over 15 years. She loves printmaking because of the workman-like process of carving and printing blocks. To learn more about Melissa and her work, go to www.mswest.com

is necessary!

All levels are welcome, no prior experience necessary!

Materials list available to view in online class listing.

Watercolor House Portrait:
Your House Has a Story!

We’ve all spent so much time at home lately that we either love our house in a whole new way, or we feel like we’re trapped! Whether you feel like you are painting your sanctuary, or painting your jail, this class will offer you the opportunity to process some of those feelings as you learn techniques for painting a structure or building of any kind. Learn a simple charcoal-transfer process to transfer a photograph of your house to paper, which means no worries about the stress of drawing! We will talk about ways to observe the character and personality of the structure, and express some of the emotions you may be feeling about your house, with many of the techniques being about seeing or feeling, as much as painting! We will talk about ways to observe the structure of the floral images. The watercolor floral techniques covered in this workshop may also be applied to other mediums and styles. You will have time to create many practice sheets, and gain more confidence in your inner artist.

Gain new watercolor techniques you can use at home. You’ll have time to complete at least one “final piece,” and you’ll get practical tips and advice about materials, and how to purchase them on a budget.

Materials list available to view in online class listing.

All levels are welcome, no prior experience necessary!

Watercolor Florals

Learn basic watercolor techniques, experiment with color, and find your unique visual voice as you create watercolor florals. Through style and technique demos, practice, and time to make a mess on practice paper, learn how different brushes can create different effects, how to paint in multiple layers, and how to get creative inside of the structure of the floral images. The watercolor floral techniques covered in this workshop may also be applied to other mediums and styles. You will have time to create many practice sheets, and gain more confidence in your inner artist.

Gain new watercolor techniques you can use at home. You’ll have time to complete at least one “final piece,” and you’ll get practical tips and advice about materials, and how to purchase them on a budget.

Create and Bake: Explore the Possibilities of Polymer Clay!

Polymer clay is soft, supple, silky, easy to shape, and comes in an almost endless range of colors. It is perfect for creating abstract, organic, or fractal like pattern sheets, crafting delicate shapes, and making all manner of small, beautiful objects. Polymer clay is a great medium for jewelry, small sculpture, and can be used in conjunction with other mediums to create amazing works of art. Join Monica and learn how to create several polymer clay projects that can be made at home. All you need is an assortment of polymer clay colors, your oven, and a few simple tools. Once you get started, you’ll never want to stop!

Expressive Painting With Layers

Let loose and experiment as you work with mixed media in layers to create vibrant, textured, and unique pieces of art! You will learn new techniques as you explore texture, pattern making, stenciling, glazing, photo transfers, and embedded objects. Experiment with acrylic paints, gesso, Modge Podge, paint pens, Sharpies, charcoal, and pastels as we create layers. Our process will allow you the freedom to create without judgment, and will complete several finished mixed media pieces on canvas. For the final phase of layering where we include found objects and images, you may include small objects (under 2.5 inches wide) and printed images in your artwork.

Materials list available to view in online class listing.

Monica Galvan

Monica Galvan, BFA, is a SPECTRA Artist with Mariposa Arts and works in multiple mediums. Her sculptures, photography, drawings, and paintings have been exhibited at the Cabrillo College Art Gallery, the Worth Ryder Art Gallery, and the Pajaro Valley Arts Gallery.
Playing with Light! Sunprints and Alternative Photo Process

Summertime, and its long, light-filled days is the perfect time to explore the seemingly magical medium of cyanotype and anthotype. Both techniques harness the power of light allowing you to create dramatic images, crisp shapes, and subtle textual patterns. This hands-on workshop will explore the history and science of these two alternative photo processes as you learn the techniques and learn about the artists that originally developed them. Learn how to use artistic compositional tools with this medium, and get guidance and hands-on practice as you create your own light-sensitive paper images.

You may purchase a materials kit for $30 which contains everything needed, or may purchase items using the materials list available to view in the online class listing. In both cases, you will have enough supplies to create up to twenty finished prints, and then continue creating more on your own!

Tue. & Thu., June 16 & 18

Storytelling with Digital Media: Telling Your Shelter in Place Story

Our stories about this once in a lifetime experience are unfolding every day. Telling and sharing them is a great way to stay healthy, and create and maintain your human connections. Learn simple storytelling and filmmaking tricks and techniques, and the basics of using digital media tools to make a short movie. Whether you started a garden, went through family photos, checked on neighbors, learned to can, or some combination of all of these, this class helps you tell and share on Facebook, Instagram, any social media platform, or emailed to family and friends.

Wendy will provide creative and technical guidance in personal storytelling that will result in a unique video. Students will learn about story development, basic lighting, sound, & video editing. Be prepared to express your creativity and have fun!

Required equipment: A smart phone, tablet, video camera or DSLR camera. A computer will help—but with mobile tech students can create everything with their device.

Great Shots from Cell Phone Cameras!

Would you like to learn more about your cell phone camera? Join Jeffery Luhn, a professional photographer for 35 years, as he shares his excitement and knowledge about cell phone cameras with you. Learn about the limitations, work-arounds, unconventional uses, effects, editing, latest apps, and the advantages that cell phone cameras have over full size cameras.

Most of all, learn to have fun with one of the most innovative and accessible technology toys of the modern age!

This workshop reveals the best approaches for getting great shots in the five most challenging situations without being bogged down by complicated camera menus. The techniques that Jeff will cover can be used with a digital camera, or your cell phone! Jeff will offer you fool-proof strategies that he’s developed over the last 35+ years as a commercial photographer and videoproducer, and that he has developed over the past 10 years as a father and grandfather.

Sat. & Sun., July 11 & 12

Digital Photography: Basics and Beyond

Would you like to use some of the extra time you have on your hands learning more about your digital camera? Do the complicated menus confuse you? Would you like to connect with like-minded photographers? Jeff will familiarize you with the most important features of your camera so you can take better photos.

This live instruction class will be taught in the virtual classroom, and is designed so you can learn new techniques, get helpful tips, then have a week between each class meeting to complete simple activities that allow you to try out your newfound skills. Return to the second class meeting and share your experience, ask questions, and get guidance from Jeff. Besides learning to control your camera, you’ll learn how to avoid bad lighting situations and recognize when the lighting is right for general photos, formal portraits, architecture, landscapes, and small objects (for Etsy, eBay, or Craigslist). If you’ve got a moderately priced camera and a desire to learn, your photos will be forever changed after this class.

Be sure to have your camera, your manual, and questions with you at each class meeting.

Jeffery Luhn

Jeffery has been a commercial photographer for more than 35 years. He has shot for many multinational corporations in over 30 countries. He has produced over 500 videos for companies and individuals, including Apple, Pixar, IBM, and Hewlett Packard. Visit Jeffery’s website at www.LuhnPhoto.com to see his work.
In order to participate in these Digital Arts classes, students will need to have the following:

- Laptop or Desktop Computer
- Access to Zoom Video platform / webcam
- Licensed, downloaded working copy of Adobe Illustrator CC installed on your computer.

Adobe Illustrator subscriptions must be purchased and installed separately, independent of this class. Class fee does not include an Adobe software subscription. Software demonstrated in these classes is available from Adobe to students for $20.99 a month for the single application or it is available as part of the entire Creative Cloud bundle for $52.99. Find out more at Adobe.com

You can easily take these classes without a stylus pen; however if it’s available, it can be helpful. Recommended but not required: Wacom drawing style pen.

Intro to Adobe Illustrator
Learn the basics of Adobe Illustrator via live, interactive Zoom sessions with your instructor and fellow students. Your class will include live demos, as well as access to tutorial videos and practice files. Whether you draw by hand want or to create an illustration from your photos, Illustrator allows you to create detailed, professional illustrations, logos, and many other creative images and designs! This is your chance to get acquainted with some of the fundamental tools and techniques most useful for graphic artists and photographers. Find out how to vectorize your pencil or ink drawings, convert a photo into editable vectors, create gradients, use layers, and more. Much of what is learned is applicable in Photoshop and InDesign as well. Each class has a matching Exercise Learning Demonstration File, so you can follow along and learn by doing. Start with the basics and work your way up to creating beautiful illustrations & graphic design projects!

This class is appropriate for students 16 years and older.

Please see shaded box, above, for complete list of items necessary to participate in this class.

Design Your Own Fabric with Adobe Illustrator
Learn to create detailed, professionally illustrated patterns for fabric using Adobe Illustrator. Whether you draw detailed designs by hand, want to create a fabric pattern from your photos or draw freehand pattern designs using Illustrator's painting tools, this class teaches you how to get your pattern ready for fabric. Illustrator is a large application and this is your chance to focus on surface textile patterns that can be printed on fabric. Techniques most useful for graphic artists and surface textile designers will be covered. Find out how to vectorize your pencil or ink drawings, add and control colors for related designs, trace and edit your design and turn it into a usable repeating pattern design for printing on yards of fabric. Learn where and how to print your surface textile pattern on fabrics.

The workshop includes a project where you can develop your own pattern from scratch or a pencil sketch. The workshop is adapted for online learning via Zoom video live demos, as well as access to learning tutorial videos and practice files. Build on the fundamental skills you learned in Introduction to Illustrator 101 (quick review refresh of tools will be included).

This class is appropriate for students 16 years and older.

Please see shaded box, above, for complete list of items necessary to participate in this class.

Alix Mullins
Alix has been a professional media and graphic designer for over 10 years and has taught Digital Media at Gavilan and Cabrillo Colleges.

Creating Logos, Text & T-Shirts: Typography in Adobe Illustrator
Learn the detailed Typography controls for working with Text in Adobe Illustrator via live, interactive Zoom sessions with your instructor and fellow students. Your class will include live demos, as well as access to tutorial videos. Working with Type is essential to creating unique, professional logos with vector artwork tools. Text slogans with graphic treatments, that would be displayed on a T-shirt or sticker, are also covered in this in-depth topic about the Text Control tools in Adobe Illustrator. The layout capabilities for text are applicable to newsletters, publications, posters, and many other types of visual communication. The workshop includes a project where you can develop your own logo from scratch or a pencil sketch.

This class is designed for students who have completed Alix’s Intro to Adobe Illustrator, or who have equivalent solid, fundamental Illustrator skills.

This class is appropriate for students 16 years and older.

Please see shaded box, below, for complete list of items necessary to participate in this class.

Character Illustration with Adobe Illustrator
Take your comic book, graphic novel, or picture book character ideas and learn how to build them up layer by layer in Illustrator via live, interactive Zoom sessions with your instructor and fellow students. This class includes live demos, as well as access to tutorial videos practice files. Alix will guide you through the necessary steps to take images from pencil to the next level by creating and organizing your illustration files in Illustrator. This workshop will include video and live demos by your instructor, as well as access to tutorial videos and practice files.

This class is designed for those students who have well-developed characters using traditional drawing techniques, and who have completed Alix’s Intro to Adobe Illustrator, or who have equivalent solid, fundamental skills with Adobe Illustrator.

This class is appropriate for students 16 years and older.

Please see shaded box, below, for complete list of items necessary to participate in this class.

Summer Sewing Social

Connect with fellow sewing, textile, fiber art, and fashion enthusiasts from the comfort of your own home to improve your sewing skills and complete your summer sewing projects. This weekly class will meet in the virtual classroom and offer you the opportunity to get together to talk sewing, share some inspiration, and enjoy Kiki's custom Spotify playlist to set the mood for the day! Each week Kiki will offer her skilled guidance and tutorials, answer questions about your current sewing projects, offer advice on how to find supplies and tools online, and invite everyone to share their own experience, challenges, tools, and tips. This class is all about staying connected, creative, and engaged through our shared passion.

Students should have a sewing project of their choice, either in progress or ready to start. Materials list provided at registration, and available to view in the online class listing, with important information about tools, supplies and materials needed for this class.

**Easy 6 Pocket Tote Sew-Along**

Create this easy to make, super-practical tote bag that is lined and has six sizeable pockets for all your stuff! This bag is perfect for a beach tote, craft or project bag, or a reusable grocery bag—with pockets for your wallet, your phone, and more! Designed as a “no waste” project, we will use every bit of fabric required. Students will sew along with the instructor and their classmates, as we build our tote bag, step by step. Students may also watch the assembly, and sew later if they like. This class is appropriate for anyone with prior sewing experience on a sewing machine.

Materials list available to view in the online class listing.

**Layered Fabric Assemblage**

Learn to create a unique fabric assemblage piece with multiple layers and textures. Using simple materials, you will learn techniques for creating a base, covered with beautiful overlays of fabric, surrounded by shapes that protrude outward, giving the piece added shape, dimension and excitement.

No sewing involved, no art experience necessary, just enthusiasm, creativity, and a sense of adventure! Vicki will offer demonstrations, answer questions, and give technical and aesthetic tips along the way. You will also gain inspiration and encouragement from the creative work of your fellow students. Your finished piece will be ready to hang on the wall!

Materials list provided at registration, and available to view in the online class listing.

**Shakespeare Plays from Home!**

Shakespeare's romances and comedies are timeless, and we could all use some joy right now! Whether you are a Bard lover, or have always wanted to see a Shakespeare play—and actually know what’s going on—this workshop comes at the perfect time. Although Santa Cruz Shakespeare has postponed its 2020 season, do not despair! You can get to know The Tempest and Twelfth Night, the plays that were planned for their summer 2020 season, in the comfort of your own home. Join Janis, and other fellow theater buffs, Shakespeare lovers, and those just looking for a way to enjoy Shakespeare's plays from home, for lively conversation, discussion, and exploration of the plays.

You’ll find lots to love in this interactive workshop designed to help you better understand Shakespeare’s humor, subtle messages, characters, and the timeless stories he tells through his plays. We’ll discuss how to “translate” Elizabethan verse and prose, and discover the three levels of society Shakespeare wrote for. Imagine yourself as a rowdy “groundling” in the Globe’s own “mosh pit!”

Students may use Folger Shakespeare Library paperback versions, readily available for order online, but any versions are acceptable.

See you anon!

**FIBER ARTS & TEXTILES**

Vicki Assegued

Vicki Assegued, MA, is an assemblage artist with an enormous passion for gathering discarded items and finding what is precious and possible in these objects. She guides and inspires others to make art from the objects in their lives, and to look at the world around them as full of creative possibilities.

Janis Hashe

Janis Hashe fell in love with Shakespeare at an early age and is now a confirmed Bardolater. Her first stage role was on the Duck Island Stage in San Lorenzo Park as Miranda in The Tempest. She has a master’s degree in theatre arts, is the former artistic director of Theatre of NOTE in Hollywood, and the founder of Shakespeare Chattanooga in Tennessee. She’s taught “Shakespeare for the Elizabethan Impaired” for more than 20 years.

Kiki Barrett

Kiki is a local designer and sewing instructor with a passion for helping others get past the fear and frustration of sewing with a sewing machine. She has shown ready-to-wear collections locally since 2013, and looks forward to helping others continue to grow as a designer and/or seamstress.

Ignited Women Book Club: Opening the Eight Gates of Wisdom

In the second half of life there are new frontiers to face with unique and complex challenges. From age fifty onward, long held beliefs or ideas about identity, relationships, creativity and satisfaction are often seen through a whole new lens. This class will help you expand your life skills and create a framework for enacting practice and rites of passage that will help with these new chapters. One of the metaphorical gates is presented in each class, followed by discussion, written reflections, guided visualizations, and rituals that explore and reflect the meaning of each gate in our lives.

Inspired by the book The Second Half of Life: Opening the Eight Gates of Wisdom by Angeles Arrien, you will be guided through eight metaphorical gates that deepen your wisdom and help shift your perspective about what is available as you move into the third phase of your life. With tools to help you master your lessons and gifts, you will feel more fulfilled in midlife and beyond. Using the practices covered in this class, you will find the courage to enact your highest values as midlife women, and experience deeper freedom and fulfillment.

Required materials and supplies list: a copy of the book The Second Half of Life: Opening the Eight Gates of Wisdom by Angeles Arrien

Introduction to Chess: Journey to the Chessical Universe

Have you always wanted to learn to play chess, but never got around to it? Did you play chess in the past and now you need a refresher? Whether it’s creativity, competitiveness, a sense of belonging to something bigger, or just plain fun, chess means something different for each player. No matter the motivation, learning and playing chess has been shown to improve memory and problem solving, develop patience, the ability to concentrate— and it’s really fun!

Enjoy a cup of tea, or festive evening beverage, as you are introduced to the fundamental chess techniques and formulating plans. Learn strategy, tactics, techniques, how to notate games, use a chess clock, and become familiar with basic principles and patterns of play.

Each class includes group play & instruction, solving chess puzzles, review of historical games, and group review of the games for support and feedback. We will also explore a game variant, ‘Escalation Chess’, that offers an exciting, enhanced version of chess.

Students must sign up for a chess.com account prior to the start of class so they will have a virtual platform on which to play.

Balanced Blood Sugar

Balancing your blood sugar can help you maintain a healthy weight, maintain your energy, and support your overall wellness—but it can be tricky! Mood and energy swings, stress & anxiety, weight gain and food cravings, and a host of other issues can be addressed by balancing your blood sugar, but knowing what’s right for your body is important! This class will help you create a personalized plan to naturally balance blood sugar through lifestyle, food choices, and herbal support. This plan will help you reduce stress and sedentary time to stabilize energy throughout the day, and stay clear, calm and focused. Participants will learn how to identify signs of blood sugar imbalances, and will develop a personalized 30-day diet and lifestyle plan in class that will help balance their blood sugar.

Good Sleep is a Reachable Dream

If you or someone you love struggles to get a good night’s sleep, this class will help! As a pillar of health, our quality of sleep has a significant impact on our mind and body, so healthy sleep is an essential part of our self care. We will explore how meal times, exercise, stress, and lifestyle can have a positive impact on sleep and overall health. Learn to identify and eliminate the root causes for your sleep issues, and learn easy ways to create an evening routine specifically designed to naturally balance sleep cycles. You will learn about safe herbal sleep support, ways to reduce stress, and how to implement simple lifestyle changes to drift into restful, sound sleep each night!

Calming Inflammation Naturally

Learn how to make food choices, choose simple exercise, and implement lifestyle changes to calm the fires of inflammation and improve your overall health. Inflammation is your body’s first line of defense against toxins, infections and injuries, and we tend to think of it in terms of the external signs like swelling and bruising. But inflammation occurs naturally in your body in many different ways, and can contribute to several health and quality of life issues.

Find out how you can calm inflammation naturally to help reduce pain, and address many other health concerns. Learn how to identify and remove foods that can trigger inflammation, and how to develop a 30-day meal, herbal, and lifestyle plan to calm chronic inflammation.

You will come away with an outline of common causes for inflammation and a template to create your 30-day plan.

Beth Nelson
Beth is a registered yoga instructor who is passionate about inspiring bold-souled midlife women to reclaim their own vitality in order to lead a deeply fulfilling life. She leads yoga classes, workshops and retreats throughout Santa Cruz County, and has worked at Cabrillo in the Academy for College Excellence.

Gjon Feinstein
Gjon is a U.S.C.F. National Chess Master who learned chess as a 10 year old, and has remained a lifelong chess player. He has introduced a near legion of students to the game of chess through school and library classes since 1995. Gjon currently offers group and individual instruction to kids of all ages and ability levels. He encourages students to develop an effective internal dialogue to help guide them through all their decision making.

Jackie Christensen
Jackie Christensen Ph.D., has a passion for herbology and education. She has served as a faculty member for many prestigious colleges where she trained students to become nutritional consultants, master herbalists, and holistic health practitioners. Jackie currently has a private practice in Santa Cruz and works as a master herbalist.
**Beekeeping Basics and Honeybee Biology**

This class is appropriate for adults with little to no experience in keeping bees. Whether you are interested in learning sustainable backyard beekeeping practices or just want a better understanding of how these delicate, intricate creatures benefit us and our planet, you will leave this class a-buzz with new energy!

This course covers hive structure, colony dynamics and delves into basic honeybee biology. We will discuss the history of beekeeping, from honey production to pollination contracts, and discuss current trends (and nfts) in colony management practices.

By the end of the course, students who are interested in obtaining their own hive will have a good understanding of equipment, tools, management practices, bee biology, and how we can work together to support these vital pollinators.

**Seasonal Hive Management for Beekeepers**

This class is designed for beekeepers with existing beehives. We will discuss keeping bees locally, the ways to expand individual hives and increase the size of your apiary.

We will cover different styles of hives, various pieces of equipment, and management approaches. The class will focus on IPM approaches, different options for tackling parasitic Varroa mites, and seasonal hive management techniques. Students will be encouraged to compare notes and strategies, and to foster community engagement and mentorship.

By the conclusion of the class, students will leave with detailed knowledge of different ways to deal with Varroa mites, and a seasonal outline for hive management.

Mon., Wed. & Fri., July 6, 8 & 10

**Start Your Own Mini Pollinator Patch**

Create a small, yet beautiful flower garden, and also do your part to save the bees, all in one! A huge part of keeping honey bees healthy is ensuring that the plants they need to survive are available to them year round. The handy thing is, those flowering plants are also beautiful, and thrive in our climate. The Urban California Native Bee Survey demonstrated that “with the right bee plants, one small urban garden can attract forty to fifty species of native bees.” Join Emily in learning how to create your own bee-friendly garden including bee-friendly native plants, drought tolerant plants, perennial and annual flowering plants, and basic bee-friendly landscape design. Emily will share images of the suggested plants, flowers, and design ideas. This class helps us all save the bees and make our gardens more beautiful at the same time!

Students will receive a plant list that breaks down the best bee plants by size, annual blooming schedule, place of origin, and water needs.

**Landlord in the Time of Coronavirus: Q & A Special Workshop**

This special workshop offers a forum for landlords, or prospective landlords, to pose questions and get answers about landlording in these unusual times. Come prepared with any and all questions including “How do I determine rent?” and “What if the tenant has asked for a rent accommodation?” and “What do I do if they don’t pay rent?” and “What is normal wear and tear when determining a security deposit return?”

We will cover as many questions as possible, and by the end of this interactive workshop you will be better prepared to manage your property, and provide legal, fair, and accurate answers for your tenants.

**To register, visit us online at cabrillo.edu/extension or call 831-479-6331**
In this course you will:

- Understand the stages of team development and how to navigate through each
- Assess your team’s effectiveness by applying six elements of successful teams
- Use the power of a team charter for getting, and keeping, the team on track

Managing Performance
Thu., August 6
9:00 am – 12:00 noon

Tackling employee performance issues is an expected part of the supervisory role. Simply telling our employees what to do and how to do it often isn’t going to solve the problem! Many performance issues stem from poorly defined expectations and lack of coaching skill.

Effective performance management starts with clear expectations, is reinforced through coaching and support—and is NOT deferred to an annual performance appraisal!

In this workshop you will:

- Determine why performance management is important and who is responsible for its success
- Learn the 4 phases of the performance management cycle
- Set SMART Goals that result in organizational success

Coaching for Results
Thu., August 27
9:00 am – 12:00 noon

Coaching, a crucial leadership skill for successful supervisors, combines building relationships, providing support and monitoring progress. Coaching empowers your employees to develop the skills they need to succeed.

Come to this course to:

- Learn and practice the precursors to coaching: being curious and asking good questions
- Review and practice a powerful 4-step model for coaching
- Develop a detailed plan to coach a specific person on your team
If you can't take the time to go to school, our online classes are here to help you study and learn at home. Our instructor-facilitated online courses are informative and highly interactive, and our instructors are famous for their ability to create warm and supportive communities of learners. These classes are available to anyone with a computer, internet access and e-mail.

Most courses are six weeks long (with an optional two-week extension). Courses include lessons, quizzes, hands-on assignments, discussion areas, supplementary links, and more. You can complete any of these courses from your home or office, any time day or night.

All courses require Internet access and e-mail. Some courses may have additional requirements. Please visit our Online Instruction Center for more information.

How to Get Started:
1. Visit our Online Instruction Center: www.ed2go.com/cabrillo
2. Select your class and follow the prompts.

Start Dates
New sections of Ed2Go classes begin on the following dates:
June 17, July 15, August 12

Over 500 courses are available on our new ed2go website!
Can’t come to campus? We’ll bring camp to you!

Take a look at our new camps; you’re going to love what you see!

Ask any kid around and they’ll tell you how excited they are for those warm, carefree summer days filled with friends, bike rides and summer camps. Camps@Home may look a little different, but we are approaching this summer with the same degree of enthusiasm as we always have! Camps@Home offer brilliant content, engaging activities, and the same dedicated instructors your kids know and love. They’ll be inspired, dive deep into their hobbies and passions, learn new skills, and interact with new and old friends.

These engaging, high quality Camps@Home are led by expert instructors and partner organizations, and include everything from culinary camps to hands-on STEM experiences, from creative arts to skills that help students succeed in college and beyond.

Have we mentioned that our instructors are amazing? They have been eager to adapt, are dedicated to helping, and are excited to lead Camps@Home. They’ve created interactive projects, group games, and new ways to keep kids engaged and excited about camp. We’re all in this together, so they will lead camps from their homes too! As always, Extension is here to provide training and support to assure fun, high quality camps.

Stay tuned! Just like you, we’ve become accustomed to the seemingly ever-changing rules revolving around the SIP Order. So, as the summer progresses we continue to evaluate in-person camps as new information is available.

Go to cabrillo.edu/youth for the latest updates, new camp sessions, and more!

“Camp at home? How does that even work?”

Help your child log in, and they can enjoy camp independently! Kids will be supervised as they spend time with their instructors and camp-mates, and get guidance for extra activities they can complete offline to share during the next camp meeting. Instructors are trained and prepared to help your child problem-solve, if necessary. In addition, many camps will give you access to the parent portal, where you can see what your child’s been working on all week long.

What it is:

✓ Real-time instruction
✓ Content designed specifically for Camps@Home
✓ Low student to teacher ratios
✓ Lots of guided and self-directed activities
✓ Activities that kids complete between class to keep them creative and energized

What it is not:

✗ Online school
✗ Pre-recorded classes
✗ Prolonged screen time
✗ Impersonal, large groups

Need help? We’re happy to assist!

Please note that due to the Shelter in Place Order, we are working remotely. You may call (831) 479-6331 and leave a detailed message, including a good time to reach you. Or, email us at extension@cabrillo.edu. You may also go to our website, cabrillo.edu/youth, to schedule an appointment for a call from one of our staff.

Discounted Fees on Select Camps for Registration Before June 11th!

Member of the American Camp Association!

Cabrillo Extension is a proud member of the American Camp Association, a community of camp professionals who share knowledge and experience to ensure the quality of camp programs! ACA provides us with outstanding resources for staff and campers, including best practices for virtual camp and expanded health and safety protocols. The standards of the American Camp Association inform our policies, procedures, and practices. Visit www.acacamps.org for more information.
Register before June 11: $65
9:00 - 10:30 am
Ages 11-14
Mon., Wed., Fri., June 15 - 19

More on their own! We will print during camp, and then continue creating at home. Students will have enough supplies to create up to 20 finished mixed media pieces on canvas.

Let loose and experiment as you work with mixed media in layers to create vibrant, textured, and unique pieces of art! Students will learn new techniques as they explore texture, sponging, pattern making, stenciling, glazing, photo transfers, and embedded objects. We will experiment with acrylic paints, gesso, Modge Podge, paint pens, Sharpies, charcoal, and pastels as we create layers. Our process will allow students the freedom to create without judgment, and they will walk away with several finished mixed media pieces on canvas.

Materials list is available to view in the online class listing.

High Contrast Graphic and Bold: Printmaking (Ages 14-17)

Printmakers have a long history of creating bold and provocative graphics. Mexican street posters, t-shirts, and protest signs are all in a day's work for printmakers. Meet Melissa virtually in her art studio for this interactive class, as you learn to make compelling linoleum block prints in your own home. We'll start by viewing examples by various printmakers, discussing styles, technique and imagery. We will explore the many ways drama and impact can be created, and the use of a variety of tools and the specific marks they make. We will also learn about the mysteries of creating lettering in reverse. What do you want to say with images?

The focus will be to help students gain experience using carving tools, and practice design, mark-making, and inking. There will be plenty of time to finish at least one black and white linoleum block print, and make a small edition. Students will gain skill and confidence to carve, ink, and print their own linoleum block prints at home.

Students will need to prepare one or two sketches or photos to use as the basis for their prints.

For the first half hour or so, at the beginning of each class, Melissa will offer demos, share videos and slides. Then students will have some time to work on their prints, with access to Melissa for questions and guidance. For the last 30 minutes of class we’ll come back together to share the work we’ve completed, get answers to questions, and compare notes on success, challenge, and everything in between!

Materials list is available to view in the online class listing.

Mon., Wed. Fri., June 15, 17 & 19

Digital Painting: Intro to Corel Painter (Ages 12-15)

This camp is designed for students who are interested in painting and visual arts, and will focus on helping students learn digital arts tools and professional industry standard painting software. Learn how to use Corel Painter’s professional painting and illustration program so that they can create their own digital paintings. Specifically for aspiring teen artists, we will cover how to select paint brushes, mix colors, apply image nozzles, use layers to build your painting, and more. We’ll start with Corel’s Painting fundamentals to get aspiring artists up and running with modern digital skills so they can get creative!

Students will need to have the following in order to participate in this class:

- Laptop or Desktop Computer
- Access to Zoom Video platform / webcam
- Licensed, downloaded working copy of Corel Painter 2020 installed on your computer. Corel Painter must be downloaded and installed separately, independent of this class. Class fee does not include a Corel Painter software purchase.
- Either a smartphone (to take photos), a point & shoot camera, or a DSLR camera is recommended. Students may work with their own photograph collection, or may download and use instructor’s provided photographs.

Software demonstrated in this class is available from Corel for students with a free 30-day trial from Corel.com and should be downloaded one day before starting the class. Students can take the class without purchasing the software if they download the 30-day free trial within the window of the class. If they like the software, parents can decide later if they want to purchase it.

Mon., Wed. Fri., June 15, 17 & 19

Monica Galvan
Monica Galvan, BFA, is a SPECTRA Artist with Mariposa Arts and works in multiple mediums. Her sculptures, photography, drawings, and paintings have been exhibited at the Cabrillo College Gallery, the Worth Ryder Art Gallery, and the Pajaro Valley Arts Gallery.

Melissa West
Melissa West is a member of the California Society of Printmakers and WEAD (Women Eco Artists Dialogue). She has been exhibiting her work throughout California for over 15 years. She loves printmaking because of the workman-like process of carving and printing blocks. To learn more about Melissa and her work, go to www.mswest.com
Digital Arts Level 1: Illustration and Graphic Design (Ages 12-15)

This camp will help aspiring young artists take their art to a higher level, and learn illustration software in a fun, creative way. This intro class includes clear lessons, instructor interactions, and practice time to learn how to use the fundamental tools. This is a great way to get a young artist up and running with modern, digital skills so they can create great graphics and illustrations at home.

Projects are focused around creating a beginning illustration using the Adobe Illustrator tools and basic graphic design and illustration techniques.

Please see shaded box, below, for complete list of items necessary to participate in this class.

Mon., Wed. & Fri., June 29, July 1 & 3
11:00 am - 12:00 noon
Register before June 11: $68
Register after June 11: $75
Alix Mullins - see bio

Digital Arts Level 2: Illustration and Graphic Design (Ages 12-15)

Designed specifically for students who have already taken the Digital Arts Level 1 with Alix, this class is focused on helping students continue to learn the professional industry standard illustration software. Students can create illustrations from their pencil sketches or their photographs, and is specifically for aspiring teen artists who want to continue to build on their basic Illustrator skills. This class reviews the fundamental tools and adds advanced tools and techniques. Students will complete one or more final illustrations based on the student’s own creative ideas, either from drawings or photographs.

Please see shaded box, below, for complete list of items necessary to participate in this class.

Digital Darkroom: Intro to Photoshop & Lightroom (Ages 12-15)

Designed for teens who are interested in digital photography, this class will focus on helping students learn to edit their photographs using the professional industry standard photo editing software in a fun and enjoyable way. Students will learn the techniques of the digital darkroom, including how to apply special color effects, painted effects, filters, and will learn how to organize and catalog photos, color corrections and more. This class starts with the fundamental tools for getting familiar with the digital darkroom to adjust exposures, and then continues to add in more advanced tools and techniques.

Specifically for aspiring teen photographers who want to take their photographs from a cell phone or DSLR camera and edit them to perfection, this class will get young aspiring photographers up and running with modern digital skills with Adobe Photoshop and Lightroom.

In addition to the items listed in the shaded box, below, students will need to have the following in order to participate in this class:

- Either a smartphone (to take photos), a point & shoot camera, or a DSLR is recommended. Students may work with their own photograph collection OR may download and use instructor’s provided photographs.

Mon., Wed. & Fri., June 22, 24 & 26
11:00 am - 12:00 noon

Intro to Photoshop & Lightroom (Ages 12-15)

This class is designed for those students who have completed Alix's Digital Arts Level 1: Illustration and Graphic Design, or have equivalent solid, fundamental Adobe Illustrator skills. Students should have developed characters, using traditional drawing techniques, ready to work with in this class.

Please see shaded box, below, for complete list of items necessary to participate in this class.

Mon., Wed. & Fri., July 13, 15 & 17
11:00 am - 12:00 noon
Register before June 11: $68
Register after June 11: $75

In order to participate in these Digital Arts classes, students will need to have the following:

- Laptop or Desktop Computer
- Access to Zoom Video platform / webcam
- Licensed, downloaded working copy of Adobe Illustrator CC installed on your computer.

Adobe Illustrator subscriptions must be purchased and installed separately, independent of this class. Class fee does not include an Adobe software subscription. Software demonstrated in these classes is available from Adobe for students for $20.99 a month for the single application or it is available as part of the entire Creative Cloud bundle for $52.99. Find out more at Adobe.com.

You can easily take the class without a stylus pen; however if it’s available, it can be helpful. Recommended but not required: Wacom drawing style pen.

Make Your Own Movies! Storytelling with Digital Media (Ages 9-12)

During this changing time, kids need to express themselves through art and media. Students will be guided to create their own stop-motion animation stories, working with what they’ve got around the house. These sessions are designed to guide young people to find a story they want to tell and give them the tools they need to achieve their goals. We will cover creating colorful characters & stimulating sets to bring their stories to life. Students will learn how to use the Stop Motion Studio app with a mobile device to shoot, edit and fine-tune their animations. Self expression and creativity can be cathartic during uncertain times, and we are committed to supporting children with mentoring that matters.

Materials list is available to view in the online class listing.

Who’s Your Hero? A Multi-media Adventure with myhero.com! (Ages 9-12 and 13-15)

How about some good news? In this camp, students will be introduced to inspiring real-life heroes who are changing the world. Who do you admire? Who do you look up to? What are the character traits that make a hero? Kids will learn how to become media makers themselves and publish positive stories, art, and films on myhero.com. They will use what they have available to create digital media tributes to their heroes. As long as students have a computer or mobile device with internet access, they can participate in learning free, web-based software including Google Slides, Adobe Spark, WeVideo, Gimp, and more. The students will decide what type of story they want to tell, then select the medium on which they’ll tell their hero story. Wendy will guide/mentor their individualized projects.

The MY HERO Project is committed to using technology for celebrating the best of humanity. Be a part of the solution and share your hero story with the world!

**Budding Chefs—Exploring our Local Bounty: Carrots! (Ages 8-14)**

Chef Sean loves strawberries so much, he thinks they are likely one of his favorite foods. However, to fully know this food, to experience it in all of its sweet, tangy, strawberry glory, you have to get your berries from a farmers market during the late spring/early summer, and they need to be organic. Seriously, the difference between store-bought strawberries and the ones you get from our local markets is incredible, and our local strawberries are so good that they are shipped all over the world! Chef Sean will fill you in on fun strawberry facts, and show you some delicious preparations and food pairings.

**Croissants Meet Chemistry: Baking with a Side of Science (Ages 14 - 17)**

Delicious baked goods and crazy kitchen science—what more could you ask for? Well, how about two young professionals who are ridiculously enthusiastic and knowledgeable about baking and science? In this wild and delicious 3-day camp, students will join Melody, a culinary arts student at Cabrillo, and Iliana, an organic chemistry student at UCSC, for baking demos, tips & techniques, recipes, and insights into how chemistry plays a part in baking. Students will discover where pastry meets protein bonding, and where dough meets diacetyl, as they are guided through each delicious recipe. There will be daily demonstrations, plenty of time for Q & A, and you'll end each day with a tasty treat (or two) and a fun science fact (or two).

Each item can be prepared with the tools most kitchens have on hand, and detailed ingredients lists are provided so you can easily shop in advance.

**Outta This World Astronomy Adventures (Ages 8-11)**

Space is often called the “final frontier” and has captured the imaginations of many! Whether it’s storytellers who drew pictures in the stars that piqued your interest in Astronomy or scientists and engineers exploring beyond our world, now it can be your turn! Whether you want to become an astronaut, study the stars, drive a rover on another planet, or are just curious about the night sky, this is the camp for you!

In this exploration of space and planetary science, you’ll measure the solar system, create your own star chart, make a mini rocket, design a mission to another planet, and much, much more! Each day will include interactive activities developed by NASA and other planetary scientists that will broaden your view of space, and your place in it.

**Science & Engineering**

**Constructor Creators: The Engineering Challenge (Ages 8-11)**

Put on your hard hat for a week of engineering exploration! Each day we’ll introduce a new branch of engineering, such as structural or mechanical. Campers will then be presented a challenge, just like one practicing engineers are tasked with solving. Working individually and with their peers in small teams, campers will design, build, and test their solution to the problem. Along the way, they’ll learn the tools and skills that help engineers build the world around us. Be sure to bring your imagination!

**Who Dunnit? (Ages 8 - 11)**

Solve puzzles, examine evidence, and work as a team to crack the case! Throughout this camp, you and your classmates will become a team of forensic scientists, just like the police, detectives, and forensic scientists that all collaborate to solve real-life mysteries. Some activities will be completed live in the virtual classroom. Others, you’ll need to work on your own and share your findings with your team. Throughout, you’ll be learning the science and tools of forensics. So grab your magnifying glass; it’s time to solve a mystery!

Students will also gain access to the virtual classroom portal, where they will find more clues, share their discoveries, and keep the investigation going beyond the live class sessions.

**Gross-ology: Ooey Gooey You (Ages 8-11)**

Did you know that you make a new batch of snot every 20 minutes to keep dirt and germs out of your body, or that you’ve got more than 5 senses? What about the fact that your intestines, unfolded, are the same length as two cars? The science of the human body is often gross, but always fascinating. Come learn about all the systems that make you, you!

Each day, you’ll step into the role of biologists, pathologists, and doctors to investigate what makes your body work. Test your senses, make “booger” slime, extract fruit DNA, discover why washing your hands is important, and so much more in this interactive camp full of hands-on activities that can be done safely from home!

---

**Melody Britt**

Melody is an advanced Culinary Arts and Hospitality Management student who specializes in baking. She has studied under several award-winning chefs, managed a cafe and bakery and is a culinary arts teaching assistant at Cabrillo College.

**Iliana Hayes**

Iliana is a UCSC student studying Biology and Organic Chemistry. She has worked for Vim Dining and Desserts for the last year where she’s learned the art of French cooking and food presentation. She uses these skills and her background in science to advance sustainable agriculture and eating practices.
**Ready, Set, Read:**

**Write Your Own Mystery (Ages 8-10)**

Make up stories, illustrate your characters, and create your own book—what a great way to start your summer! This camp supports developing reading & writing skills, reading comprehension, and English Language Arts skills as campers write their own “mystery story book;” including their “author’s statement,” and they’ll create their own cover art and illustrations. We will combine creative writing, mixed media art, group discussions, reader’s theater, and fun, educational technology based games to build their reading, writing, and spelling skills. No testing and no pressure, just a safe space to learn, play, and build confidence!

2 Mon., 2 Wed., 2 Fri., June 15 - 26
2:00 - 3:30 pm
Register before June 11: $120
Register after June 11: $140

**Blanket Fort Book Club**

(Ages 5-7)

Grab your favorite blanket and curl up with a good book in our virtual reading room! Pick up your book box from Bookshop Santa Cruz. Each book box contains 4 books selected by Lori just for young readers, and each week, we’ll read one together, plus Lori’s special selection of the day! Lori will lead a story circle by reading stories, and will encourage students to join in and read portions of each story to their classmates. Lori will guide young readers through playful, creative projects connected to story themes to get little minds and bodies moving. Parents are welcome to join, but are not required to stay for the duration.

**Youth Leadership Academy presents**

**Cultivating You & Your Community: Leadership Skills for Personal Success (Ages 12-16)**

The concept of leadership is changing. It is a journey to create habits for personal success, including collaboration, emotional intelligence, and creativity. Those who feel successful in their lives are often guided by an inner compass, a map of the territory, and a clear destination. This academy is designed to help emerging leaders develop their personal compass, learn how to create their map, and help them identify their destination.

Through exercises, games, social and interpersonal group activities, writing, art projects, and a lot of fun, we will dive into ideas about the physical, emotional, mental, and aspirational well being it takes to be a conscious leader.

We will discuss the 4 most important characteristics of leaders: Inspiring, Forward Looking, Honesty, and Competent. As we learn ways to enact these characteristics, our first five days will focus on one of five exemplary practices to achieve personal success:

- **Model the Way**
- **Inspire a Shared Vision**
- **Challenge the Process**
- **Enable Others to Act**
- **Encourage the Heart**

Families are invited to log in with their students on our final day for a closing ceremony. Each student will receive a certificate of completion following the conclusion of the program.

Along with live group sessions via Zoom, students will have access to the camp portal, where they will complete offline activities and discussions between classes.

Students will come away with a personal success action plan that they are excited about, and want to see come to fruition. They will acquire tools to help them with mindfulness, problem solving, trust, decision making, confidence, and building relationships.

A guide for parents and students will include talking points, prompts for conversations, and activities that students and parents will use between sessions to deepen and enrich student experience. This guide is also designed to help families continue the conversation about leadership and personal success far into the future!

Students will be asked to take risks, get active, be thoughtful, and generally be open and engaged.

2 Mon., 2 Wed. & 2 Fri., July 6 - 17
11:00 am - 12:30 pm

**Brandi Tucker**

Brandi Tucker, M.A. is a 4th grade teacher and instructional aide. She has been working as an educator for over 20 years. She has a passion for cultivating student curiosity through project based learning, hands-on activities, physical activity and expression.

**Lori Kearney**

Lori Kearney, MA, currently works at Main Street Elementary School providing reading intervention, English language development, and technology support to students in K-5th grade.

---

**Jennifer Mount**

Jennifer graduated college with a BA in Secondary Education and began her career as a high school Spanish teacher. Over the years, she developed a passion for the subject of “conscious leadership.” After receiving her MBA at the University of San Francisco, Jennifer transitioned into professional and leadership development education serving global fortune 500 companies such as 3M, Microsoft, and Google Ventures. Jennifer is a mother of two, and is the lead instructor for professional development at Cabrillo College Extension. Jennifer is thrilled to be marrying her educational experiences with the Youth Leadership Academy.

Samurai Chess Camp

Whether it’s its creativity, competitiveness, a sense of belonging to something bigger than you, or just plain fun, chess means something different for everyone. No matter the motivation, learning and playing chess has been shown to improve memory and problem solving, develop patience, the ability to concentrate—and it’s really fun! In these camps, young chess players will learn strategy, tactics, and various techniques. Campers will learn to notate their games, use a chess clock, and become familiar with basic principles and patterns of play. Each camp includes group instruction, solving chess puzzles, review of historical games, group play, and a group review of the games for support and feedback.

Students must sign up for a chess.com account prior to the start of class so they will have a virtual platform on which to play.

Beginning Players

(Ages 9 to 12)

This camp focuses on fundamental techniques and formulating plans, as well as a game variant, ‘Escalation Chess,’ that offers an enhanced version of chess that encourages visualizing checkmate patterns even more than usual.

Students should have a working understanding of the game’s general rules, names, abilities and trading value for pieces, and knowledge of basic chess terms such as: check, checkmate, stalemate, rank, file, diagonal, opening, middle game and end game.

Students must sign up for a chess.com account prior to the start of class so they will have a virtual platform on which to play.

10:00 -12:00 noon
Register before June 11: $98
Register after June 11: $110
Gjon Feinstein - see bio

Intermediate Players

(Ages 13-17)

This camp focuses on learning match play, including chess notation, clock usage, strategies and reviewing games and game variants. These variants offer a fun, enhanced version of chess, creating a kind of special universe in which students can use classical chess ideas, themes and principles, with an altered set of foundational rules. The game variants we will learn and play are ‘Bug house,’ ‘Knight mare,’ (imagine ‘Magic’ cards combined with regular chess) and ‘Fischer Random’ chess (‘normal’ opening preparations are thrown out the window replaced by a new order of ideas).

Students should have a working understanding of the game’s general rules, names, abilities and trading value for pieces, and knowledge of basic chess terms such as: check, checkmate, stalemate, rank, file, diagonal, opening, middle game and end game. Additionally a general understanding of opening principles, simple tactical themes like the ‘fork’ and ‘pin’ and the ability to solve checkmate in one puzzle with relative ease.

Students must sign up for a chess.com account prior to the start of class so they will have a virtual platform on which to play.

Gjon Feinstein

Gjon Feinstein is a U.S.C.F. National Chess Master who learned chess as a 10 year old, and has remained a lifelong chess player. He has introduced a near legion of students to the game of chess through school and library classes since 1995. Gjon currently offers group and individual instruction to kids of all ages and ability levels. He encourages students to develop an effective internal dialogue to help guide them through all their decision making.

**PLEASE NOTE:**
Check-in begins 15 minutes before the start of each class.
Game Labs: Build Your Own Board Game (Ages 8-11)

Like playing board games? Take your play to the next level by designing your own! Pick a theme, create your game board and pieces, and customize the rules. During the camp, you’ll learn about different genres of board games and play a few short examples. Then, pair up with a teammate to plan, design, and test your game ideas during the live class meetings, and throughout the week using the virtual camp portal. By the end of the week, you’ll have a complete game ready to play with your family at home!

Game Labs: Introduction to Dungeons and Dragons (Ages 8-11 & 12-15)

In 1974, Dungeons and Dragons started a phenomenon that is stronger than ever. There are now dozens of different rule sets, countless different scenarios, and infinite ways to tell a story together with your friends! Begin the week by learning the basic rules of Dungeons and Dragons, 5th edition, as you explore your first world. We’ll delve into world building, character creation, story pacing, team problem solving, math and science concepts, and so much more as you collaboratively write a scenario to take home and play with friends and family. By Friday, you’ll not only know how to play, you’ll be the Dungeon Master!

Campers will end the week with the outline of their custom 2-3 hour scenario, character sheet templates, and their hand-crafted Dungeon Master screen—everything they need to start their own D&D game at home!

Dungeons and Dragons (Ages 14-17)

Spend your mornings with your teacher and a small group of 3 students in your class to dive deep into the structured but open-ended world of Dungeons and Dragons! Do battle with monsters and explore dungeons as you and your friends tell a story, guiding your heroes through quests for treasure, daring rescues, courtly intrigue, and much more. Critical thinking, social interaction, and endless imagination make this experience rich and rewarding. We have made this world come alive through our virtual camp program and we can’t wait to take you on your next adventure. Join with your friends or we will match you with other quest seekers.

Mornings include a social event to relax between classes and get to know more of the community. Your SummerTech portal will also give you access to a wide variety of afternoon social activities between 3 and 5, including events around gaming, art, music, community, wellness, and more. Spend quality time exploring all of these choices and finding new friends and activities in this immersive, people-first camp!

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux computer or laptop to participate in this camp.

Mon. - Fri., July 27-31 9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Video Game Animation (Ages 8-11 & 11-14)

Take your game design skills to the next level by creating and animating your own character sprites, objects, and backgrounds. Start with a name, develop the character’s personality, signature moves, special powers, and a storyline. Finish with a fully animated character to be used in your very own game. Students do not need any prior experience in game design, animation, or sketching.

Games are only compatible on PC computers; Mac versions can be created after the program for $15.00 conversion fee.

Pytho.n Programm.ers  
(Ages 8-11 & 11-14)
Want to learn the world’s fastest-growing programming language favored by Google, NASA, Youtube, and the CIA? Learn how to code with Python to create engaging apps and games. Each lesson takes you step-by-step on a programming path that will let you challenge friends with fun content you create from start to finish! Returning students can create more advanced projects that build on previous years.

Ages 8-11
Mon. - Fri., June 15-19
8:30 - 11:30 am
OR
Ages 11-14

8:30 - 11:30 am
Register before June 11: $195
Register after June 11: $210

JavaScript Developer Jam  
(Ages 8-11 & 11-14)
Learn programming tools so powerful they seem like magic! Start off by learning an array of core programming concepts with JavaScript by experimenting in a series of digital challenges. Start with programming your first animated memes, then tackle more advanced skills such as interactive 3D experiences and game creation.
Projects will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., June 29 - July 3
8:30 - 11:30 am
Register before June 11: $195
Register after June 11: $210

3D Game Design with Unity  
(Ages 8-11 & 11-14)
Are you ready to take your game design skills to another level? With Unity, an industry-grade design software, aspiring game designers will learn level editing, 3D modeling, impactful gameplay creation, as well as how to utilize scripts and variables.
Student-created games will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., June 29 - July 3
12:30 - 3:30 pm
OR
Ages 11-14
Mon. - Fri., June 29 - July 3
8:30 - 11:30 am

Register after June 11: $210

eSports Apprentice: Streamers and Gamers  
(Ages 8-11 & 11-14)
Whether you want to be the next pro gamer, streamer, or gamecaster this course will teach you the basics to get started! No longer just a hobby, eSports is the fastest-growing career for the next generation. Over 400 million people watched YouTube videos and Twitch streams of video game competitions this year alone! In this course, students will develop game-play skills and compete using Black Rocket’s eSports games and apps, learn how to produce commentary for live tournaments, use professional streaming software, and most importantly practice online safety.
Student recordings will be available on a password protected Black Rocket website to share with friends and family. Videos will not be broadcast publicly but will be shared with all students in the class.

Ages 8-11
Mon. - Fri., June 22-26
12:30 - 3:30 pm
OR
Ages 11-14

YouTube® Content Creators  
(Ages 8-11 & 11-14)
Find your voice and leave your mark on the world! Whether you are six or sixty, it’s time to start a career as the next YouTube star. Explore the variety of content and personalities that exist on YouTube and how to find your own niche. Learn the Do’s and Don’ts of the platform and how to practice good digital citizenship. Develop your on-camera presence, your own channel branding, and professional editing skills. Take home a plan for launching your own channel with the content created in class!
Student projects will be available on a password protected Black Rocket website to share with friends and family.

Inventor’s League: Prototyping for the Future!  
(Ages 8-11 & 11-14)
Become an inventor of the future! Learn “rapid prototyping” and problem solving as you conceptualize and design a product to solve a critical global issue. Each day begins with inspirational profiles of young inventors, such as the eleven-year-old who coded a robot to find victims of natural disasters. Next, research a problem to tackle in medicine, architecture, the environment, or a topic of your choosing.
Once your vision is complete, learn how to draft 2D designs, create 3D models, and develop a website to pitch your ideas to the class.
Student projects will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., July 6-10
8:30 - 11:30 am
OR
Ages 11-14
Mon. - Fri., July 6-10

Computers & Technology

Minecraft® Animators (Ages 8-11 & 11-14)
Create the next popular animated Minecraft® video on YouTube! Practice the same skills professionals at Pixar and Disney Animation Studios use. Discover the process of keyframing and tweening, and how to use it to bring your own animated stories to life, and how to publish your content on YouTube.

Student projects will be available on a password protected Black Rocket website to share with friends and family. Mac users can play their project at home, but will not be able to edit the project without a PC.

Ages 8-11
Mon. - Fri., July 13-17
12:30 - 3:30 pm
OR
Ages 11-14
Mon. - Fri., July 13-17
8:30 - 11:30 am
Register before June 11: $195
Register after June 11: $210

Minecraft® Designers (Ages 8-11 & 11-14)
If you love the game Minecraft and have always wanted to design your own world, this class is for you! Learn how to create a custom map, the basics of creating 3D models using a new software to design your very own objects, how to build with Redstone and Command blocks, and create custom textures for you to import at home or share with friends.

Students must own a Java version of Minecraft to take this class. Tablet, phone, and game console versions of Minecraft are not compatible. Parent email address is required to use 3D modeling software.

Ages 8-11
Mon. - Fri., July 13-17
8:30 - 11:30 am
OR
Ages 11-14
Mon. - Fri., July 13-17
12:30 - 3:30 pm
Register before June 11: $195
Register after June 11: $210

Pokémon® Masters: Designers & 3D Makers Unite! (Ages 8-11 & 11-14)
Calling all boys and girls who want to be the designers of the future! In this class, if you can dream it, you can make it! Begin by creating your own digital Pokemon-style custom playing card game. Progress onto designing action figures, jewelry, and toys in professional-level modeling software. Learn how to prepare a model for 3D printing and create a design portfolio to showcase your work!

No prior experience is necessary and 3D designs will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., July 13-17
12:30 - 3:30 pm
OR
Ages 11-14

8:30 - 11:30 am
Register before June 11: $195
Register after June 11: $210

Rocket Kart Racers: Design A Mario Kart® Style Game (Ages 8-11 & 11-14)
On your marks, get set, create! Blast off in making your first 3D Mario Kart® and Crash Team Racing® style game! Design your own tracks and customize your karts and characters. Using a professional 3D game development software, students will combine their creations into their own kart racing game that they can play with friends and family at home. Students can participate in eSports League races against other schools across the country with a chance to have their tracks featured in the Black Rocket master build of the game!

Student projects will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., July 20-24
12:30 - 3:30 pm
OR
Ages 11-14
Mon. - Fri., July 20-24
8:30 - 11:30 am
Register before June 11: $195
Register after June 11: $210

Battle Royale: Make Your First Fortnite® Style Video Game (Ages 8-11 & 11-14)
Fans of Fortnite: we need you! Instead of playing the game, design your own. Using a professional 3D game development software, build levels and assets inspired by popular battle royale games like Fortnite.

Students can participate in eSports League matches against other schools across the country with a chance to have their levels featured in the Black Rocket master build of the game! This course includes cartoonish action and battle sequences.

Student-created games will be available on a password protected Black Rocket website to share with friends and family.

Ages 8-11
Mon. - Fri., August 3-7
8:30 - 11:30 am

Minecraft® Redstone Engineers (Ages 8-11 & 11-14)
Take the next step beyond simply “playing” Minecraft and become a true Redstone engineer. Expand your Redstone knowledge by constructing your own carnival with a variety of mini-games, roller coasters, and attractions powered by Redstone. Learn how to use Command and Structure blocks to incorporate them into your builds. Activate your skills and take your Minecraft structures to the next level!

Students must own a Java version of Minecraft to take this class. Tablet, phone, and game console versions of Minecraft are not compatible.

Ages 8-11
Mon. - Fri., August 10-14
8:30 - 11:30 am

Computers & Technology

Your virtual camp week focuses on the Summertech motto: Have fun, learn something! Campers spend the mornings with their teacher, and a small group of no more than 3 students in your class, to dive deep into course subject material. Morning classes come with a social event to relax between classes and get to know more of the SummerTech community. Spend quality time exploring all of these choices and finding new friends and activities in these immersive, people-first camps.

Your SummerTech portal will also give you access to a wide variety of afternoon social activities with the SummerTech community including events around gaming, art, music, community, wellness, and more.

Coding with Java (Ages 14-17)

Make your mark on over 3 billion devices. As one of the most popular programming languages, Java powers software around the world. Learning how to program with Java will enable you to build a wide range of web systems and apps. Both desktop and mobile applications use Java, making this language a must-have in the world of tech. Teens with Java experience get a competitive edge in education and the working world.

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux computer/laptop to participate in this camp.

Mon. - Fri., June 29 - July 3
9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Coding with Python (Ages 14-17)

Python is your gateway into coding anything you can dream of. From games and apps to automated scripts and data science, Python’s syntax allows you to focus on building a comprehensive understanding of coding concepts and powerful problem solving skills that can be applied even outside of programming. Work with a small, conversational group and one of our super-smart instructors as you build programs that challenge and enlighten. Whether you’re a novice programmer or already a coding veteran, we will be with you every step of the way.

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux laptop or desktop computer to participate in this camp.

Mon. - Fri., June 22-26
9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Web Design: HTML, CSS, and JavaScript (Ages 14-17)

Web pages are the window to the Internet. This web design course gives you the tools and skills to build websites and web applications based on your interests and passions. Develop your own platform to the world through HTML, CSS, and JavaScript skills. Receive projects that provide a rewarding challenge at your skill level. Work with a small group for immediate sharing and feedback from your peers. Your imagination is the only limit to your success in this all-new web design course.

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux computer/laptop to participate in this camp.

Mon. - Fri., July 6-10
9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Fundamentals of 3D Modeling (Ages 14-17)

In our new 3D modeling course, learn the fundamentals of creating digital 3D models through Blender. Develop models of real-life objects as well as your favorite fictional characters. With 3D modeling, you can follow your artistic inspiration while learning how to master the software. Advanced students can learn texturing, rigging, and even begin animating. Create art for video games, model your favorite Star Wars spaceships, introduce yourself to 3D animated movies, and more!

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux computer to participate in this camp.

Mon. - Fri., July 13-17
9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Digital Animation in Two Dimensions (Ages 14-17)

Our 2D animation program, featuring industry standard software Toon Boom Harmony, offers students a creative release. Every level, from beginner to advanced can create cartoons and interactive movies based on their original ideas. Our instructor works closely with each student to help learn the fundamentals of digital animation. You will find productions made in Toon Boom Harmony all over television and the big screen. This is the real deal - let's do this!

Chromebooks and other tablets will not support the camp content. Students will need access to a PC, Mac, or Linux computer to participate in this camp.

Mon. - Fri., July 20-24
9:00 am - 12:00 noon
Register before June 11: $248
Register after June 11: $260

Since 2002 Summertech’s low-ratio (3:1) and conversational classes, enriching activities, and radical acceptance fosters meaningful relationships and social growth. Instructors are raised and trained from within, through a robust leadership program that promotes campers into leaders, to produce an ever-evolving environment where anything is possible. They are a community of welcoming, like-minded young individuals who come together every summer to share and explore ideas.
Motorcycle Safety Training

Our award-winning motorcycle safety class is the only CMSP (California Motorcycle Safety Program)-approved class in Santa Cruz County!

Our program received CMSP Awards for Excellence of Rider Coaches and Range Safety.

Successful completion of the Motorcycleist Training Course fulfills the DMV requirement for under-21 riders. Riders over 21 also benefit, since successful completion of the course may waive the riding skills test at the California DMV, and insurance discounts may be available.

Class size is extremely limited, and classes fill early!

SCHEDULE:

We are currently in the process of creating a new schedule of Motorcycle Safety Training courses. Classes will be available in mid–late June with a number of flexible sessions.

For more information and to get on our waiting list please email us at: extension@cabrillo.edu

FEES:

Fee for students under 21: $295
 Fee for students 21 and older: $350

For Class Schedule and online registration, see: http://www.cabrillo.edu/services/extension/motorcycle.html

CABRILLO CORPORATE TRAINING

Would you like to have a more productive and effective workforce?

Today’s fast-paced business environment demands a highly-trained and effective workforce. If you want to stay in business, you need to help your workforce perform at their best.

Leaders…

need to establish direction and communicate effectively both internally and out in the community.

Managers and Supervisors…

need to define work, manage people and teams, create a positive and productive organizational culture and lead engaging meetings.

Staff…

needs to work effectively together, provide exceptional customer service, meet quality standards, and deliver on deadlines.

All these things are possible when you have effective and affordable workforce training at your fingertips!

At Cabrillo Corporate Training, we can help you…

- Define your direction based on your values and your strengths.
- Develop standards and identify competencies that will guide and align all of your training efforts.
- Identify the performance you need from your workforce and the training gaps that need attention.
- Deliver targeted training programs on site, based on your schedule, to meet your needs.
- Evaluate the training to ensure a return on your investment

Why invest in employee training & development?

It’s simple. Effective employee training means increased productivity and greater organizational effectiveness. It means you are better able to cope with the demands of today’s competitive business environment.

Plus: Improved employee morale, greater job satisfaction and motivation. Long-term employee development efforts keep an organization vital and successful.

Our seasoned experts bring dynamic and rich training programs to you!

Visit us at: www.cabrillo-corporatetraining.org
For more information call: 831-479-6331
Although we are not in the office, we are here for you!

The Extension team is working from home, and still here to help!

You can still register online at cabrillo.edu/extension and if you have any questions, or need help getting registered, our staff is available Monday through Friday, 9:00 am to 5:00 pm.

You may leave us a message at (831) 479-6331, or email us at extension@cabrillo.edu. We are checking voicemail and email several times a day, and will reply by the next business day. If you would like to talk to one of our staff, let us know a good time to call you back, and we can help get you registered over the phone.

Things have changed—a lot—but REGISTRATION is still easy!

The fastest way is to use our online registration at cabrillo.edu/extension which is available 24 hours a day, 7 days a week.

If you received a credit to your Extension profile as a result of the Shelter in Place order and class cancellations, you may use your credit by logging into your profile. When you have classes in your cart and you are ready to check out, you will see your electronic voucher balance and you will select the “apply” box; your electronic voucher balance will be deducted from your amount due.

If you would like to register by phone, please email us first at extension@cabrillo.edu with your name, your phone number, and a good time to call. Our staff is working from home, and we check email several times a day, and return calls within regular business hours of 8:00 am to 5:00 pm.

Classes are offered via Zoom, but students do not need to have a Zoom account! You can join directly from your favorite web browser. Just one click, and you’ll be taken straight to your virtual classroom, no extra log-in required.

MAIL-IN FORM for ADULT REGISTRATION ONLY—Please note, due to the Shelter in Place Order, the Cabrillo Extension office is closed until further notice. As a result, mail-in registrations may take up to 2 weeks to process. Please send the completed form below to:
Cabrillo College Extension, Bldg. 2100A, 6500 Soquel Drive, Aptos, CA 95003
