Student submits signed contract to Carolyn Jackson by the last day to add/drop courses in the semester covered by the contract. Both instructor and student receive a copy of the contract.

Thanks to Katharine E. Harer of Skyline College for the template for this contract.
The Physics 4C curriculum will be supplemented by additional laboratory work and research paper. This lab work will be conducted under the supervision of the physics department. The lab will examine the course material in a broader and deeper perspective than is expected of other students. It will culminate in the submission of a research paper to the instructor of superior quality. The paper will include personal library research to further support my lab results. The lab will be approximately 3 hours and the corresponding research paper will be at least 5 hours. A total of 8 hours will be supplemented to the course and will be used to further my understanding of the Physics 4C curriculum.
