The District shall have an advisory committee for each Career Technical Education program. Membership is drawn from organizations that may employ graduates of the program, unions that represent those employed in the field, institutions to which graduates transfer and schools that feed into the program as well as individuals who have special expertise in the field served by the program. These committees provide advisory guidance to the programs regarding the learning outcomes required for student success in seeking employment, career advancement, and transferring for further education. The committees also assist programs to stay abreast of changes in the industry, project labor market demand for graduates from the program, advise on curriculum, provide assistance with staffing and equipment, aid in the placement of students, and provide a general liaison with employers and employees in the various careers for which the college offers instruction.
