

## **Math Online Orientation**

### **Already have a Coursecompass account?**

If you took this class last semester and we are still using the same book the access code you purchased is still valid. All you need is the course id for this semester's course. Read the information in my website to see how to get it.

Once you have the new course id, log in to your Coursecompass account, and find where it says "My account" or "Manage my account" or something like that! That is where you enter the new course id.
