The Friends of the Swallows at Cabrillo College is a group of students, staff, faculty, administrators, and community volunteers who have come together to advocate for and support the colony of migrating Cliff Swallows which reside at Cabrillo from spring through summer. Our mission is to raise awareness of the Cliff Swallows and their environs, to educate our community of their activities, to encourage sustainability and co-existence, to support the colony by cleaning up the living space we share, and to create a positive, friendly, and comfortable relationship with them.
